

HARTHAM PARK ESTATE TECHNOLOGY THAT LEADS THE WAY

OUR STATE OF THE ART TECH

Taking centre stage is a striking 3.5m x 2m HD LED screen (163”), designed to deliver maximum impact and bring presentations vividly to life. Paired with state-of-the-art technology throughout the estate, our spaces are perfectly equipped for conferences, meetings, and large-scale corporate events of any kind.

Every meeting room features integrated tracking cameras, premium Bose speakers, and professional-grade display technology, allowing seamless video conferencing via Microsoft Teams and Zoom. All spaces can be interlinked, enabling live streaming and shared content across the estate for a truly connected, immersive experience.

Our advanced audio system includes in-room speakers, wireless handheld and lavalier microphones, alongside two to three discreet linear array microphones installed near the ceiling. This ensures exceptional sound clarity and high-quality audio capture for both in-person and hybrid events — no matter the scale.
